DETAILED ACTION

Claim Objections

1. Claims 11-13 are objected to because of the following informalities: Applicant claims " plurality of light conversion elements configured at an outside of the diffusion plate" in claims 11-13, applicant then claims " the outside of the diffusion plate facing towards the reflection polarizer...". It is suggested that applicant change "the outside" to "said outside" for clarification purposes, since the diffusion plate has two outer surfaces that would be facing either the light guide plate or the reflection polarizer. Appropriate correction is required.

Allowable Subject Matter

2. Claims 11-22 are allowed.
3. The following is a statement of reasons for the indication of allowable subject matter: The prior art cited does not anticipate individually nor teach in combination the following limitations;
- The arrangement of the light guide plate, diffusion plate, and reflection polarizer as recited in claims 11-13 and in particular the feature of the light conversion elements being configured on an outside surface of the diffusion plate, said outside surface of the diffusion plate facing towards the reflection polarizer and being opposite to the portion of diffusion plate positioned above the light guide plate.

Conclusion

4. This application is in condition for allowance except for the following formal matters:

As stated above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
